Brief information about the project

Name of the	AP19680048 Methodology on integrating language and media education
project	to develop youth's media literacy as a factor in socialization and intercultural interaction
Relevance	In the context of the technological revolution, the role and place of media in people's lives and the educational process have significantly increased. The distortion of the media space by propaganda, fake information, digital aggression, cyberbullying, trolling, etc., the "digital divide" of generations, and "information overload" actualized the social order for training specialists capable of critically interacting with media content, interpreting, determining their economic, political, social interests, and producing their content using various ICTs, to better adapt to social and professional changes. At the present stage of the development of pedagogical science and practice, the relevance of the research topic lies in the need for a comprehensive analysis of current trends in media education as an essential aspect of socialization and cross-cultural interaction of a person for the subsequent improvement of the principles and means of implementing language learning.
Purpose	The aim of the Project is the theoretical substantiation, practical development, and experimental approbation in the educational process of the pedagogical model of integration of language and media education to form media literacy among Kazakh youth as a key factor of their socialization and intercultural interaction.
Objectives	 analyze the current state of the problem of media education in domestic and foreign studies and substantiate the set of provisions that form the conceptual basis for the formation of media literacy among university students; To identify the essence and content of media literacy as a goal setting and result of media education, to determine its place in the structure of the communicative competence of a modern specialist; to develop a methodological system for modelling the process of integration of language and media education for the formation of communicative and media competencies among university students; to conduct an experimental test of the model of media literacy formation in the context of the integration of language and media education and to implement the results obtained in the practice of language learning.
Expected and achieved results	 publications of two articles in peer-reviewed scientific journals indexed in the Scopus database, having a CiteScore percentile of at least 35 (thirty- five) and <u>one</u> article in a peer-reviewed scientific journal indexed in the Arts & Humanities Citation Index of Web of Science; publications of three articles in peer-reviewed foreign and (or) domestic publications recommended by the CQAFSHE; publication of the <u>collective monograph</u> "Theory and Practice of Integration of Media Education in Language Education"; designing <u>online courses</u> "Professional Kazakh (Russian) language", and "Professionally oriented English"; obtaining patents in Kazakhstan or the Eurasian <u>patent;</u> development of "Methodological Recommendations for designing Didactic Materials to Integrate Language and Media Education"
