| Name of the project | AP15473326 “Frequency dictionary of the kazakh language - teaching the state language teaching the state language to students of technical universities of Kazakhstan” |
| Relevance | Statistical data of words and word groups in the "Frequency Dictionary of the Kazakh language" allow to carry out a comparative analysis of the lexical composition of the Kazakh language, to provide accurate information about the vocabulary, to solve many theoretical problems of the Kazakh language in general. Frequency dictionary is the only necessary tool for the implementation of measures on the state language policy, which are very relevant today: teaching the state language, especially in the creation of textbooks, manuals, dictionaries, language (lexical, grammatical) minimums will be found. |
| Purpose | To determine the boundaries of the vocabulary of the language, including those actively taught in specialized technical universities, thereby effective textbooks, and manuals for those learning the Kazakh language, especially as a second language, the lexical material needed to develop a lexical and grammatical minimum. |
| Objectives | <p>Development of technology for tiered learning of the state language for students at technical universities on the basis of the frequency dictionary of the Kazakh language;</p> <ul style="list-style-type: none"> - Development of a sample of tasks of the first level in the study of the state language for students at technical universities on the basis of the frequency dictionary of the Kazakh language; - Development of a sample of tasks of the second level in the study of the state language for students at technical universities on the basis of the frequency dictionary of the Kazakh language; - To show the features of tiered learning in the state language for students at technical universities on the basis of the frequency dictionary of the Kazakh language; - Computer-generated Kazakh frequency dictionary of minimums for technical specialties based on educational materials of students studying in technical universities of Kazakhstan based on the frequency dictionary of the Kazakh language (several specialties will be selected to create a dictionary. Based on the frequency dictionary); - The frequency is fully integrated into the electronic database to create a dictionary. The collected texts are subject to technical corrections and processing. - write a computer program that calculates the statistics for each of these frequency dictionaries, depending on the type; - write a statistical description of the received frequency dictionaries; - Publication in the form of books and electronic dictionaries. |
| Expected and achieved results | a) On the basis of the frequency dictionary of the Kazakh language will be developed technology for teaching the state language to students at technical universities. |
