

Brief information about the project

Name of the project	«Evolution de la politique extérieure multivectorielle de la République du Kazakhstan»
Relevance	The principle of multi-vector foreign policy is a feature born out of objective circumstances of our state. In the new environment of geopolitical and geo-economic changes, the country's leadership had to look for the new forms of interaction with regional and global powers to preserve the multi-vector nature of its foreign policy. The relevance of the theme is due to the need to study the ways of evolution of the multi-vector foreign policy of the Republic of Kazakhstan
Purpose	- study the influence of new geopolitical and geo-economic conditions on the mechanisms of implementation of the multi-vector foreign policy of the Republic of Kazakhstan and make a forecast analysis of the direction of its evolution
Objectives	<ul style="list-style-type: none"> - develop a methodology for the study of multi-vector; - analyze the evolution of the conceptual foundations of multi-vector and the modernization of its practice; - analyze the main directions of the multi-vector foreign policy of the Republic of Kazakhstan and their evolution; - make a forecast analysis of possible threats to the multi-vector capability of the RK.
Expected and achieved results	Based on the study of the set goal and objectives, publish a collective monograph in English
