

## Brief information about the project

|           |  |
|-----------|--|
| Title     | IRN AP22686474 “Anthology of Arabic-language sources of the Kazakh thinkers in foreign archives”   |
| Relevance | The idea of the project is aimed at distinguishing the scientific heritage of Kazakh figures in world archives based on sources in the Arabic language and determining their contribution to the field of world science. Since Arabic was the language of international communication in the Middle Ages, sources in Arabic were scattered in archives around the world. Since the middle of the last century, some of the manuscripts related to Kazakh scientists have been obtained, but the majority of them have not yet been studied and have not entered scientific circulation. Therefore, we aimed to fill this gap by systematic research of world-class large archives. The results of the project are closely related not only to the field of Islamic studies, but also to the subjects of data science and history. Therefore, the results of the project allow to look at several areas of humanitarian sciences from a new perspective.  |
| Goal      | The goal of project is creating an anthology of Kazakh steppe thought based on study of Arabic–language sources, materials, databases stored in archives of various countries and providing bibliographic, brief annotations of works in Islamic world that have important scientific significance.  |
| Tasks     | <p>Project Objectives</p> <ol style="list-style-type: none"><li>1. Study of catalogues of library collections of various countries of the world to identify and classify archives storing materials on the Kazakh steppe;</li><li>2. Compiling a list of works dedicated to Muslim education in the Kazakh steppe from archives of the world, collecting information about representatives of the Kazakh steppe and their works, determining the historical periodization of data;</li><li>3. Systematization of manuscripts in libraries and archives containing information on the history of the formation of religious education in the Kazakh steppe;</li><li>4. Analysis of the history of the formation and features of Muslim education through the study of biographical data, the works of Kazakh scientists and the cultural environment that influenced the formation of their personalities on the basis of primary sources from archival collections of different neighboring countries;</li><li>5.
