

## Brief information about the project

Name of the project	<b>AP14871410 “World spiritual values: the idea of love for humanity in Abai's work”</b>
Relevance	<p>The scientific project analyzes <b>the idea of love for humanity in the works of Abai in the context of world spiritual values</b>. The development of the human mind has always defined goodness and wisdom in human nature as spiritual values. The main content of Abai's poems is Man, human virtues and morality. The main value of the concept of “complete man” made by the Kazakh thinker is to love the creator, humanity. The main way to achieve such a humane position is a virtue. The main relevance of the research project is the in-depth study of Abai's poems, which formed such lessons as “How can I become ignorant, when I’m called a Human”, “Love humanity, feel the wisdom of God, is there anything more interesting than that in this life”, “Love all humanity as a brother”, from a cognitive, logical-semantic, linguo-philosophical aspects.</p> <p>Various changes taking place in modern society require a re-examination of Abai's works and the inclusion of human and spiritual values from them into the agenda. Abai's idea of “loving all mankind as a brother” has acquired a conceptual significance today. Every nation needs a peaceful life, not war. Therefore, the reality of today emphasizes the need for a scientific assessment of this idea in the works of Abai, the teaching of the doctrine of “complete man” in schools and colleges, the study and promotion of Abai's teachings, which systematize and substantiate the Kazakh cultural and spiritual code.</p> <p>President K.K. Tokayev in his article “Abai and Kazakhstan in the XXIst century” writes: We need to restudy Abai’s “complete man” concept. Our scientists should do new research in this area. I believe that the concept of “complete man” should become the cornerstone of any sphere of life, public administration and education, business and family institutions.  <a href="https://www.akorda.kz/kz/events/memleket-basshysy-kasym-zhomart-tokaevtyn-abai-zhane-hhi-gasyrdagy-kazakstan-atty-makalasy">https://www.akorda.kz/kz/events/memleket-basshysy-kasym-zhomart-tokaevtyn-abai-zhane-hhi-gasyrdagy-kazakstan-atty-makalasy</a></p> <p>Abay's poetry reflects human spiritual values. The concept of the world of spiritual and cultural values in the national worldview was born on Kazakh soil through the works of Abai. Introduced by the famous French scientist P. Lipi, E. von Hartmann's axiological principles and system of philosophical concepts were written in Abai's works based on the Kazakh worldview. The research project is based on Abai's concept of “complete man” as the main value, it scientifically studies and analyzes the idea that he called the world's spiritual culture “love all mankind as your siblings”. The main feature of the work is the analysis of the essence and meaning of the value of the path of goodness shown by Abai through the deep semantic structure of language units. The main feature of the research project is the analysis of the linguo-philosophical features, essence, spiritual and cultural cognitive dimension of the spiritual value of “love of all mankind” through the principles of linguistics. The research project explores the ideas of humanism in Abay's poetry, such as simplicity, hospitality, generosity, honor, and speaking for humanity, the field's passionary worldview of “love all mankind as a brother” will be analyzed in the linguocultural and linguo-philosophical aspects. It is known that the basis of Abai's doctrine of “complete man” is: “Only three things are human qualities: hot courage, radiant mind, warm heart.” It is necessary to show and present this steppe doctrine to the world. The main relevance of the project is the scientific and theoretical assessment of the concept of “love of all mankind” and its axiological nature and the manifestation of the main concept of morality and</p>

	<p>goodness, which has long been formed in the Great Steppe. The main concept of Abai at the world level is the passionary assessment of human nature at the human level, the main concept of the idea of “love of all mankind” in the scientific project is considered in this context. The project scientifically analyses the fact that the idea of feeling the wisdom of God and loving mankind began not only with Abai but with all the ideas of Eastern wisdom, that it is the conclusion of all the ancient ideas of world spiritual culture. At the same time, it is believed that the Kazakh proverbs, rhetoric, and works of poets, ranging from the myths formed by the Kazakh worldview and thinking, allowed Abai to come up with the idea of “loving all mankind.”</p> <p>Hakim Abai's wisdom lies in the fact that he absorbs the knowledge he had in the East, the language experience and the rich taste in the system of thought, and conveys it in a special new content, in a special form, with new results. There is no doubt that it is important for our modern society, which is about to build a new Kazakhstan, to study in a new direction the main ideas of Abai's concept of “love for all mankind.”</p>
Purpose	<p>To study scientifically that the main source of Abai's phenomenon in the world is the idea of loving humanity, to create a scientific basis for the concept of “love all mankind like your siblings” to become the main concept of modern Kazakh spirituality, to study of information provided through the poetic text, based on the methodological and aesthetic basis of verbal wisdom, as a manifestation of the ideas of humanism, formed based on the worldview of the Great Steppe.</p>
Objectives	<p>According to the purpose of the project the following main tasks are set:</p> <ul style="list-style-type: none"> <li>- Review of scientific principles of axiological values in world linguistics;</li> <li>- Analysis of spiritual values in Abay's poetry;</li> <li>- To show the linguistic and philosophical significance of Abai's concept of “complete man”;</li> <li>- To determine the scientific basis of the idea of “Love all mankind as a brother”;</li> <li>- Study of passionary ideas and Abay's teachings in world spiritual culture;</li> <li>- The study of the concept of virtue and goodness in the works of Abai from the linguistic and cognitive aspects;</li> <li>- Scientific analysis of language units that define the concept of “complete man” in terms of text semantics;</li> <li>- To study that the integrity of Abay's work is the integrity of thought;</li> <li>- Linguocultural analysis of the concept of “Love all mankind as a brother”;</li> <li>- Development of a scientific concept of the idea “Love all mankind as a brother”.</li> </ul>
Expected and achieved results	<p><b>Scientific results of the project "World spiritual values: the idea of love for humanity in Abai's works" include the following:</b></p> <ul style="list-style-type: none"> <li>• Scientific and theoretical analysis of scientific research related to axiological linguistics in World linguistics;</li> <li>• In accordance with the main principles of axiological linguistics, the main axiological concepts in Abai's work will be analyzed, and these concepts are connected with human thought and conception;</li> <li>• When Abai's concept of the "complete man" is studied from the logical-semantic, linguo-philosophical aspect as the main value, the requirements for evaluating the intellectual property of a person will be expressed;</li> <li>• The value of Abai's poetry lies in its individuality and logical consistency in the use of words, in the concreteness of thought, in the presence of knowledge at the height of the Human Horizon;</li> </ul>

- Abai's idea of "loving humanity" is combined with scientific theories written at the world level in the assessment of human values;
- A clear line of thought, embodied in the concept of goodness and well-being in Abai's works, reflects the image of the nation, country, people, and their worldview;
- The basic principles of Abai's teaching of the "complete man", independent of time, are the main factor determining the National Code;
- The study of the interaction of individuality and integrity with each other at the level of semantics in Abai's poems determines the essence of perception of the nature of the poems;
- The concept of "love for all mankind" is one of the main indicators of the National worldview. It includes the main concepts of the National CODE: Hospitality, kindness, and spiritual values;
- The idea of loving all mankind is the poet's invaluable contribution to human values.

According to the calendar plan, Abai's concept of "complete man" as the main value was studied in the logical-semantic and Linguo-philosophical directions. With the help of linguistic, philosophical dictionaries, the linguistic and philosophical meaning of the concept of "complete man" was revealed. The importance of the concept of "complete man" on the way of thinking, development, Search, Knowledge was analyzed through the use of words in Abai's poetry. The science of language at the end of the twentieth century studied that a person who speaks a particular language is a carrier of conceptual systems. Each concept combines fundamentally important knowledge about the world for a person. The system of concepts forms a picture of the world, reflecting a person's understanding of reality, its special conceptual "drawing", on the basis of which a person learns the world.

Abai, despite the fact that there is no separate science in the Kazakh land, clearly defined the cognitive, axiological features and humane purpose of "human studies". We recognize that there is a moral dimension in the concept of "complete man". The concepts of knowledge and science as a value that improves human intelligence were considered on the basis of Abai's works.

Abai's idea of "love of humanity" was combined with scientific theories written at the world level in assessing human values; passion ideas in World spiritual culture and Abai's lessons were studied. Abay's work is recognized as the starting algorithm for the spiritual development of the nation. Abay is a broadening of the horizons of the National worldview at the human level, Abay is a guide to innovation, like a clear trail running on snow - white snow, Abay is a guide to be a whole peace, to be a complete person, Abay is a wise sage of the Kazakh word, Abay's word is the world of wisdom. Abai's ideas were compared with the thoughts of Socrates, Aristotle, Al-Farabi, Kant, and a separate chapter was written. It has been proven that the integrity of the teaching in the person of Abai is connected with the ideas of passion in the world spiritual culture. The idea of great people is intertwined in terms of the ability to distinguish between good and bad.

The concept of goodness and goodness in the works of Abai based on many poems it was analyzed in the linguophilosophical, linguopsychological direction. Lectures on Abai's worldview were given at the Aydin University in Turkey, the International Association of young writers in Baku, the Kazakh Turkish university in Turkestan, and Al-Farabi University.

At the Faculty of Philology of Al-Farabi University, a special course "Linguopoetics of the word Abai" has been introduced and taught.
